Chapter 25: Beyond Our Solar System. Earth Science. Guided Notes. 25.1 Properties of Stars. Characteristics of Stars. A ____ is an apparent group of stars originally named for mythical characters.

Chapter 25: Beyond Our Solar System

This geocentric view, backed by the very powerful religions at the time, endured for more than 1,400 years until it was toppled by Copernicus and confirmed by Galileo. Through their observational evidence, and by using the newly invented telescope, they produced data and logic supporting a Sun-centered, heliocentric model of the Solar System.

Big History Project: Chapter 2 - Our Solar System and Earth

Welcome to ASTR 1010. This course is a general introduction to solar system astronomy for non-science majors. The principal goals of the course are to give you an idea of how a physical science like astronomy works and to introduce you to some of the latest discoveries about the solar system.

ASTR 1010/7010 - Astronomy of the Solar System Fall 2018 ...

Two points in any orbit in our solar system have been given special names. The place where the planet is closest to the Sun (helios in Greek) and moves the fastest is called the perihelion of its orbit, and the place where it is farthest away and moves the most slowly is the aphelion. For the Moon or a satellite orbiting Earth (gee in Greek), the corresponding terms are perigee and apogee.
