The history of chemistry represents a time span from ancient history to the present. By 1000 BC, civilizations used technologies that would eventually form the basis of the various branches of chemistry. Examples include the discovery of fire, extracting metals from ores, making pottery and glazes, fermenting beer and wine, extracting chemicals from plants for medicine and perfume, rendering ...

History of chemistry - Wikipedia

Chemistry: The Central Science in SI Units. Theodore Brown. ... I just got it and I've been waiting to buy this book from the first day when the 12th edition got put in. The delivery made no harm to the book. The quality of the pages and the describing structure is great. I dunno about the answers as per the questions yet.
