Processor design is a subfield of computer engineering and electronics engineering (fabrication) that deals with creating a processor, a key component of computer hardware.. The design process involves choosing an instruction set and a certain execution paradigm (e.g. VLIW or RISC) and results in a microarchitecture, which might be described in e.g. VHDL or Verilog.

Processor design - Wikipedia

The iPhone 3G is a smartphone designed and marketed by Apple Inc.; it is the second generation of iPhone, successor to the original iPhone, and was introduced on June 9, 2008, at the WWDC 2008 at the Moscone Center in San Francisco, United States.. The iPhone 3G is internally similar to its predecessor, but included several new hardware features, such as GPS, 3G data and tri-band UMTS/HSDPA.

iPhone 3G - Wikipedia

3G, 4G, LTE, 5G cellular modems are great alternatives for more expensive satellite dishes, with lower cost and enhanced mobility. However, live webcasting or live video streaming from the field over a single cellular modem is rarely successful because of the variability of single modem performance.
