up, though: the DOM is a representation of a web page in the form of an object, made up of properties that represent each of the document's child elements and subproperties representing each of those elements' child elements, and so on.

JavaScript for Web Designers: DOM Scripting - A List Apart

Read Online Dom Scripting Web Design With

The Document Object Model is a cross-platform and language-independent interface that treats an XML or HTML document as a tree structure wherein each node is an object representing a part of the document. The DOM represents a document with a logical tree. Each branch of the tree ends in a node, and each node contains objects. DOM methods allow
