Drunken trees, tilted trees, or a drunken forest, is a stand of trees rotated from their normal vertical alignment.. This most commonly occurs in northern subarctic taiga forests of black spruce (*Picea mariana*) under which discontinuous permafrost or ice wedges have melted, causing trees to tilt at various angles.

Drunken trees - Wikipedia

The last days of the dying person should be spent in the most peaceful manner possible. Dying in one's home is also preferred in our culture because it gives the dying person a sense of warmth and familial bond. reflecting on this, I believe that dying in one's home is also a sign that the eventual death of a family member has already been accepted by the family.
