Getting Indexed By Bibliographic Databases

Arne Kusserow, Sven Groppe: Getting Indexed by Bibliographic Databases in the Area of Computer Science has index h if h of his or her N p papers have at least h citations each and the other $(N - p + h)$ papers have h citations each. Not surprisingly the inclusion in bibliographic databases is one of the most important key factors for

Getting Indexed by Bibliographic Databases in the Area of ...

Bibliographic databases are tools used to systematically search the scientific literature to identify relevant papers; therefore they play a vital role in EBVM. A database systematically indexes articles from a given list of journals and other professional publications, and each database may search a different set of journals - a list of which should be clearly defined by that database.
