Installed in October 2019. there are 4 heating zones with settings 1-9. 1 through to 6 are not enough to boil and 7 through to 9 will boil over. 6 won't even simmer unless you keep the lid on. The right front zone works for all induction pans. The left front only works for 2 of my 4 pans and none of my induction frying pans.

03 - Using the hob - Side Control Ceramic Hob Do not use the ceramic hob if the glass surface is cracked, as electrical parts are directly beneath. Switch off the appliance at the supply to prevent electric shock and contact your supplier. The appliance is not intended to be operated by means of an external timer or separate control system.

Ceramic Side Control Hob - Shirlaw Homes

Ceramic hobs. These hobs are very elegant and very easy to clean. They are electric hobs, so they have an extra element of safety if you have young children. They heat quickly and modern hobs come with touch controls. However, common problems include being cracked and broken by dropped lids or even pots and the surface is easily scratched.

8 Common Hob Problems and Repairs - Appliance Insurance

Information Regarding The Elements. If we take the top of the ceramic hob off we can give you an idea of what's going on inside. An element is quite simple, as it's essentially a resistive wire which has current passed through it and the resistance causes it to get hot - which is obviously what cooks the food.. As you can see here there are four rings inside the ceramic hob, with two two rings ...
