in modern passenger cars use synchronizers, or synchros, to eliminate the need for double-clutching. A synchro's purpose is to allow the collar and the gear to make frictional contact before the dog teeth make contact. This lets the collar and the gear synchronize their speeds before the teeth need to engage, like this:

Manual transmissions have been disappearing for some time now: Each year, fewer cars offer a stick shift as an option. There are just over 40 models in the U.S. that are still available with a manual transmission. Many of these cars come standard with a stick shift on the least-expensive base trim.
