There are many inconsistent findings in the literature, however, and it is difficult to resolve discrepancies because measures of social support vary widely from study to study.

Assessment of methods for measuring social support

Abstract. Social support is a concept that, because of its pervasive role in human affairs, needs operationalization and assessment. One of the primary confusions about social support is that the term is linked both to objective events (actual availability of others) and to subjective estimates (perceptions of others' willingness to help).
