The genus  
Enterococcus includes  
microorganisms that  
have a historical  
connection with the  
genus Streptococcus,  
and their initial  
documentation is  
related to the  
“streptococci of fecal  
origin” or  
“enterococci”. This  
chapter provides  
information on

anaerobic cocci that form short- to medium-length chains. In the 1930s, Lancefield devised a serologic typing system that classified enterococci as group D streptococci, along with some organisms (eg, *Streptococcus gallolyticus*, formerly *S. bovis*) that differed from enterococci in a number of other features.
