### Mind in Life Biology Phenomenology

Thompson draws upon sources as diverse as molecular biology, evolutionary theory, artificial life, complex systems theory, neuroscience, psychology, Continental Phenomenology, and analytic philosophy to argue that mind and life are more continuous than has previously been accepted, and that current explanations do not adequately address the myriad facets of the biology and phenomenology of mind.

### Mind in Life: Biology, Phenomenology, and the Sciences of ...

"Mind emerges from matter and life at an empirical level, but at a transcendental level every form or structure is necessarily also a form or structure disclosed by consciousness. With this reversal one passes from the natural attitude of the scientist to the transcendental phenomenological attitude (which, according to phenomenology, is the properly philosophical attitude)." — 4 likes

organization of biological life already implies cognition, and this incip-ient mind finds sentient expression in the self-organizing dynamics of action, perception, and emotion, as well as in the self-moving flow of time-consciousness. From this perspective, mental life is also bodily life and is situated in the world. The roots of mental life lie not simply in the brain, but

### Mind in Life

In Mind in Life. Evan Thompson aims to assemble a framework for cognitive science that will begin to harmonize biology and phenomenology so as to help close the notorious "explanatory gap" between consciousness and nature. Thompson does not claim to close this gap completely, but to "enrich the philosophical and scientific resources we have for addressing" it (p. x).
