Principles Of Modern Wireless Communications Systems

Modern Wireless Communication i.e. using electrical signals and radio waves for communication has been around us for more than 100 years. In the year 1897, Guglielmo Marconi successfully demonstrated the Wireless Telegraphy by sending EM Waves for a short distance of 100 meters.

Wireless Communication: Introduction, Types and Applications

At the end of the 19th century, the first wireless communication systems were introduced and the technology has significantly been developed over the intervening and subsequent years. Today, the term wireless refers to a variety of devices and technologies ranging from smart phones to

laptops, tabs, computers, printers, Bluetooth, etc.
