Roof Curb Trane

Read the entire manual carefully to become familiar with the roof curb installation procedures. If the roof curb will be mounted on a new building, it can be assembled at any convenient location and installed as soon as the roof support members are in place. As a general rule, the curb should be placed directly on the roof support members. Use tack welding or other suitable fastening method to secure the roof curb

Roof Curb 12½ - 25 Ton Packaged Rooftop Units

Trane recommends that the roof curb be placed directly on the roof support members and welded into place. If the curb is mounted on the roof deck, additional support is necessary directly below the curb flanges to minimize vibration. †Do not overlap counter flashing over the top of the roof curb.

Products - Custom Roof Curb Manufacturer | Thybar

When a building is constructed, prior to the installation of the HVAC Rooftop Unit (RTU), the roof is cut, and a metal structure called a Roof Curb is installed. The roof curb is designed to support the weight of the unit, and to offer a means for contractors to connect the supply & return air duct work.
