Shine a Light: Secrets of the Vegetable Garden (Shine-A ...

Ideally, your entire vegetable garden should get at least 8 hours of full sun a day. Most vegetables won't do well even in partial shade, so be sure to plan your garden where it will get as much sun as possible. For corn, do like the Native Americans did and plant pole beans near each cornstalk as soon as it is a foot high.

Vegetable Gardening Secrets Exposed | American Worm Castings

The surest way to increase the yield from a vegetable garden is to reduce the space between plants. The idea is to plant wide bands, thus reducing the amount of ground devoted to paths. To start an intensive garden, make a bed of any length, but limit its width to 3 to 4 feet across so you can reach the center of the bed from either side.
