Sleeping Beauty Math Problems Grade 1

Some try to answer question (B) for Sleeping Beauty, and get 1/2 because the probability over the course of the experiment is 1/2. But an awake SB can only address question (A). The answer to (A) is 1/3, because it applies to her making her evaluation one-and-a-half times.

probability - Sleeping Mathematician (Sleeping Beauty ...

The Sleeping Beauty problem is a puzzle in decision theory in which whenever an ideally rational epistemic agent is awoken from sleep, she has no memory of whether she has been awoken before. Upon being told that she has been woken once or twice according to the toss of a coin, once if heads and twice if tails, she is asked her degree of belief for the coin having come up heads.

Sleeping Beauty problem - Wikipedia

Here's a quantum analogy: The Sleeping Beauty problem is like an unobservable particle in a quantum superposition of 50 percent H and 50 percent T among the ensemble of puzzle enthusiasts. As in quantum mechanics, when an actual measurement is made (a concrete question is posed), the state is correctly found by the ensemble to be either H or T.
