how to create a button to do some function in xpce/prolog ...

XPCE is an object-system written in the C-language. It provides for the implementation of meth-ods in multiple languages. New XPCE classes may be defined from Prolog using a simple, natural syntax. The body of the method is executed by Prolog itself, providing a natural interface between the two systems. Below is a very simple class definition.

SWI-Prolog 5

X-Prolog is a lightweight Prolog implementation intended to facilitate programming in logic on Android. This app runs Prolog programs in a console view or as a bound service to a client app.

X-Prolog - Apps on Google Play

SWI-Prolog is neither a commercial Prolog system nor a purely academic enterprise, but increasingly a community project. The core system has been shaped to its current form while being used as a ...

(PDF) SWI-Prolog

The programming is done in Prolog or some other language and with Prolog as the glue, while XPCE is mostly a passive GUI, sort of like HTML forms. The program creates XPCE objects, changes their state and reads values from them. XPCE doesn't normally write to the program other than some small GUI-related messaging; but even that is usually done ...
